JOSHUA NG
FULLSTACK DEVELOPER

Stockholm │ joshjoelng@gmail.com │ www.joshuauaua.github.io

SUMMARY

With over a decade of experience leading creative projects at the intersection of art, culture, and technology, I've produced work for clients like Google and Fujifilm Nordic, and collaborated with artists such as Jacob Collier and Shankar Mahadevan. My transition into fullstack development builds on this foundation—combining a strong creative background with technical skills in .NET Core, JS, React, and machine learning to develop innovative, human-centered digital tools.

PROFESSIONAL EXPERIENCE

Sonic Assembly │ Founder & Sound Designer   2023 - Present

- As a freelancing sound designer and composer, successfully delivered projects for brands such as Google Deepmind, Polar Skate Co and Fujifilm Nordic.
- Ran a pilot project commissioned by Goethe Institute on ML-driven audio waveform analysis tool

STPLN (Föreningen Stapelbädden) │ Project Leader   2017 - 2023

- Led national and international creative projects from grant applications and budgeting through implementation and final reporting, coordinating multidisciplinary teams and stakeholders.
- Developed and managed programs such as a media lab in Amman, long-term residencies for European creatives, and international exhibitions on speculative design
- Produced 200+ events such as conferences, workshops, talks and festivals, running budgets and communications as well as facilitation.
